Summary

I'm a self-taught front-end developer, creating websites since 2010. Over the last decade, I've had the pleasure of working with multiple agencies to build over 200 websites, focusing on clean, maintainable code.

Work Experience

Front-End Developer, *Calibrate Marketing*

July 2020 — Present

- Lead front-end development for 20+ projects, engaging with the team to ensure a steady workflow.
- Convert wireframes and mockups into interactive web applications.
- Create modular design components to simplify and easily maintain building block-based pages.
- Install a custom scalable boilerplate library (Sass), providing a structurally sound foundation for web applications.
- Communicate remotely with team members to find solutions to seemingly intractable problems.
- Support and maintain front-end development, including new functionality for client websites.

Front-End Developer, *Freelance*

August 2013 — July 2020

- Independent front-end development for 150+ projects, committing to a healthy coding style and standards.
- Create fully responsive and modular websites, focusing on the compatibility of all modern browsers and devices.
- Write several unique plugins, Vanilla JS and jQuery, enhancing the overall users' browsing experience.
- Develop and design multiple fully responsive WordPress, and Commerce themes.
- Collaborate with a few major brands (Uber, Timberland, Birkenstock, ASICS, Qantas, Bed Bath & Beyond) to produce engaging and shareable content.
